Código: [97916771](#)

The Grundfos Comfort B PM and BX PM pumps are designed for recirculation of domestic hot water in single- and two-family houses securing hot water instantly to all faucets. The pumps have a corrosion-resistant pump housing suitable for drinking water and are powered by a single-phase, high-efficiency ECM with permanent-magnet rotor. COMFORT B PM and BX PM meet homeowner requirements for continuous operation.

COMFORT BX PM has a built-in isolating valve and a non-return valve (fitting). This ensures that maintenance can be carried out without draining the system. The non-return valve also prevents reversed flow during operation.

Features and benefits:

- Quick and simple electrical installation.
- Dry-running protection protects the pump against dry running during startup and normal operation.
- Easy-to-clean and lime-resistant spheric rotor.
- Noiseless operation due to liquid-lubricated bearing.
- No leakage risk due to a static seal.
- Easy maintenance and cleaning through the easy-to-separate pump head.
- No additional motor protection necessary due to integrated motor electronics.
